Connecting to the Wolf-Fi network with an iPhone

1. Connect to OWL Wi-Fi and, ignoring any prompts from your phone to sign in, visit https://ruckus.wolf.ox.ac.uk/activate/
   Log in with your Remote Access username and password.

2. Allow the website to open Settings.

3. Choose to Install the Zero-IT Activation

---

1 Your Remote Access username will be the same as your SSO, but the passwords should be different. You can activate or reset the password on your Remote Access account by visiting https://register.it.ox.ac.uk/self/remote_access
4. Confirm that you wish to **Install** the unsigned profile.

5. Select **Install** one more time to configure your device.

6. Confirm that the profile is installed and select **Done**.

Your device should now be able to connect to the Wolf-Fi network – you may have to select this manually.

Please contact it.support@wolfson.ox.ac.uk if there are any problems.
